Sub 3

an antisense oligonucleotide comprising consecutive nucleotides, the nucleotide sequence of which is set forth in one of SEQ ID NOS:1 and 3-13, wherein one or more sugar of the oligonucleotide contain an -OMe group at its 2' position.

- -26

F 540 /

(2X Amended) A method of promoting the regression of vascular lesions, comprising introducing into a vascular cell an amount of a composition of matter comprising an antisense oligonucleotide comprising consecutive nucleotides, the nucleotide sequence of which is set forth in one of SEQ ID NOS:1 and 3-13, effective to reduce the levels of bcl-xL protein produced, thereby promoting the regression of vascular lesions, wherein one or more sugar of the oligonucleotide contain an -OMe group at its 2' position.

-128.

 \int_{0}^{3}

(Amended) A composition of matter comprising an antisense oligonucleotide comprising consecutive nucleotides, the nucleotide sequence of which is set forth in one of SEQ ID NOS:1 and 3-13, wherein one or more sugar of the oligonucleotide is modified at its 2' position.

Please add new claims 63, 64 and 65 as follows:

-63.

(New) An antisense oligonucleotide consisting of consecutive nucleotides, the nucleotide sequence of which is set forth in SEQ ID NO:2, wherein one or more sugar of the oligonucleotide contain an
